

Jansen Mok

San Jose, CA | (408) 723-2888 | jansenmok@gmail.com | [linkedin.com/in/jansenmok/](https://www.linkedin.com/in/jansenmok/) | github.com/JansenMok

Education

University of California, Berkeley

May. 2026

Bachelor of Science, Electrical Engineering and Computer Sciences (EECS)

Skills

Languages: Python, C/C++, Java, Swift, SQL, Git

Tools: TensorFlow, PyTorch, Scikit-Learn, Sentence-Transformers, LlamaIndex, NumPy, Streamlit, pytest, Xcode IDE, Linux, Jupyter

Relevant Coursework: AI—Machine Learning, Generative AI; Mathematics—Discrete Math, Probability, Differential Equations, Linear Algebra; Computer Science—Data Structures, Computer Architecture, Microcoding and Pipelining, Multithreading and Multiprocessors, Computer Security and Cryptography; Circuits—ASIC Digital Design and Integrated Circuits, Microfabrication Technology

Projects

RAG-Based Article Q&A System, San Jose, CA

May. 2025 – Jul. 2025

- Architected RAG pipeline using LlamaIndex to ingest and chunk 1K-token articles into semantic embeddings
- Integrated Google Gemini-2.5-Flash API for generation and embeddings utilizing latest google-genai SDK
- Built a vector store index and configured top-k retrieval (k=3) so that every query is grounded at query time
- Implemented a web UI with Streamlit enabling users to ask questions in browser and see instant responses

ConsensusAI – Comparison Agent for commercial LLMs, Berkeley, CA

Jul. 2025 – Sep. 2025

- Built a system to compare responses from multiple LLMs for consensus or disagreement
- Implemented text normalization, Sentence-Transformers semantic embeddings, and hierarchical agglomerative clustering to detect consensus or disagreement with zero LLM bias or hallucinations
- Designed an extractive consensus engine using MiniLM-L6-v2 to summarize agreeing content
- Created a comprehensive testing suite with pytest library for biasless agreement detection

Berkeley Mobile, UC Berkeley, Berkeley, CA

Sep. 2025 – May 2026

- Integrated MapKit in Swift to build a study spot discovery feature, pinning curated on-campus and nearby locations as productive alternatives to campus libraries
- Implemented a user-contribution flow for students to submit new spots for team review
- Collaborated with a cross-functional team on biweekly Agile sprints, contributing to a production iOS app with regular App Store releases

VMware Hackathon 1st Place: Waste Sorting CV App, VMware Headquarters, Palo Alto, CA

Jul. 2019

- Won First Place at VMware Hackathon, building an iOS app using Computer Vision and ML to classify waste as Recyclable, Compost, or Landfill
- Implemented real-time iPhone camera integration for on-device image classification

Experience

Software Technical Assistant, West Valley College, Saratoga, CA

Jun. 2022 – Aug. 2023

- Resolved hardware and software issues for student and faculty computers as part of the campus IT team
- Wrote Python scripts to automate deployment of required applications across 1000+ student and faculty laptops, eliminating an estimated 200+ hours of manual install time
- Implemented seamless migration of 300 campus systems between macOS/Windows with minimal downtime

Business Analyst, Xenia Gifts LLC, San Francisco, CA

Sep. 2019 – Aug. 2022

- Verified authenticity of vendor purchase receipts by utilizing AI-powered Optical Character Recognition
- Onboarded and trained new employees to achieve high performance standards

Community Volunteer, The Tech Interactive, San Jose, CA

Apr. 2019 – Jan. 2020

- Dedicated over 70 hours teaching students about electrical engineering principles and earthquake science
- Facilitated student groups in constructing structurally sound Lego buildings and mobile space rovers

Extracurricular Activities

Yonsei Korean Language Institute: 3-Week Program, Yonsei University, Seoul, South Korea

Dec. 2024 – Jan. 2025

- Attained proficiency in Intermediate Level Korean for Speaking, Reading, Writing, and Listening

Open Computing Linux Facility (OCF), UC Berkeley, Berkeley, CA

Aug. 2024

Half Marathon: Brazen Racing, San Leandro, CA

Aug. 2019

- Achieved third place in the 13–17 age group at 14 years old with a personal record of 1:44:13
